Degrees Offered

The Doctor of Philosophy (Ph.D.) degrees in Informatics and Computer Science and the Ph.D Minor in Bioinformatics are offered through the University Graduate School. In addition, the School of Informatics offers the Master of Science in Bioinformatics, the Master of Science in Chemical Informatics, the Master of Science in Computer Science, and the Master of Science in Human Computer Interation Design (see the School of Informatics graduate bulletin).

Ph.D. Minor in Bioinformatics

Bioinformatics draws on knowledge and information from various fields such as biology, computer science, medicine, chemistry and physics. Students in relevant Ph.D. programs such as biochemistry and molecular biology, medical and molecular genetics, medicine, chemistry, or biology are the target audience for the Ph.D. minor in bioinformatics.

Requirements
A minor in bioinformatics requires 12 credit hours. The core curriculum consists of graduate level courses in informatics. Electives may be chosen based on personal interests from a broad list of courses in biology, chemistry, computer science, information science, and medical and molecular genetics.

The graduate bioinformatics courses in the School of Informatics assume a minimal knowledge of cell and molecular biology. That level of understanding could be gained with at least 6 undergraduate credit hours in molecular biology, genetics, or evolution.
