Women's Studies Program

Women's studies brings together faculty, women and some men, interested in women's issues in teachings, research, and service. Interdisciplinary in nature, WOST explores a wide range of issues as seen through the perspective of gender. Women's studies can help shape a vision of women's position in society

that will enable students to make a more meaningful contribution wherever their career paths and future engagements may lead. A degree in women's studies should enhance a student's effectiveness in virtually any career.

For careers in law or social service, WOST gives insight into social practices that oppress women, such as rape, abuse, and job discrimination. For careers in biology, medicine, nursing, or other allied health professions, WOST offers an understanding of women's health needs. For business careers, WOST teaches students to understand the barriers and the opportunities for women seeking careers in the corporate world.
